CONTENTS

Nanometer Measurement Instruments and Metro-Instruments

Invited Papers

A Novel Multi-function Tribological Probe Microscope for Characterising Surface Properties ................................................................. 1
X. Liu

In-situ Self Calibration of Nano-metrological Sensors and its Uncertainty ................................................................. 13
Satoshi Kiyono, Hiroki Shimizu

Nanometer-resolution Mapping of Local Elasticity by a Sensitive AFM Cantilever with its Mass Concentrated ................................................................. 21
Muraoka M., Kamata H.

Calibration of Non-Linearity of Piezo Elements and Image Distortion in Atomic Force Microscope ................................................................. 25
Zhang Haijun, Zhang Dongxian, Zhang Hu, Lin Xiaofeng

Papers

Step Height Measurement by Atomic Force Microscope ................................................................. 29
Paul Kam-Wa Lui, Yen-Liang Chen, Chao-Jung Chen, Gwo-Sheng Peng, Victor Tzeng-Yow Lin

SEM 1-D Grating Measurement Compare to AFM and Laser Diffractometer ................................................................. 34
Bin-Cheng Yao, Shen-Peng Pan, Chao-Jung Chen, Paul Kam-Wa Lui

An Investigation of Electrically Powered Micro Air Vehicles ................................................................. 38
Wu Huaiyu, Zhou Zhaoying, Dong Sun, Xiong Shenshu, Wang Xiaolao

The Application of Atomic Force Microscope for Roughness Measurement ................................................................. 44
Yen-Liang Chen, Paul Kam-Wa Lui, Victor Tzeng-Yow Lin

New Scanning Mode of Scanning Tunneling Microscopy ................................................................. 46
Fu Xing, Wei Xiaolei, Li Mengchao, Hu Xiaotang

NanoFabrication by AFM Field-Induced Oxidation Process in Different Environments ................................................................. 50
Zheng Lifen, Hu Xiaodong, Hu Xiaotang

Progress in Studies on Long-Range and Ultrahigh-Accuracy Nanometer Measurements ................................................................. 54
Chen Benyong, Li Dacheng

 Atomic Force Microscope And Anti-Corrosion Processing of Porous Alumina ................................................................. 60
Zhang Dongxian, Zhang Haijun, Lin Xiaofeng, Zhang Hu

Effects of Fabricating and Installation Errors on a Nano-alignment System ................................................................. 65
Chen Yuhang, Huang Wenbao, Yuan Dajun

Dual Imaging-unit Atomic Force Microscope and its Application in Nanometer Order Length Metrology ................................................................. 73
Lin Xiaofeng, Zhang Haijun, Zhang Dongxian, Zhang Hu
Calibration of Spring Constant of an AFM Cantilever for the Study on
Ligand-Receptor Interaction
78

Yi Ran, Li Yanning, Wang Yanxia, Fu Xing, Hu Xiaotang
Compensation for Nonlinearity in Heterodyne Interferometer with Nanometric
Accuracy
83

Li Yongqian, Zhu Mingquan
Capacitance Transducers and Their Use in Position System With Nanometer Accuracy
88
Zhang Honggang, Wei Wei, Zheng Yizhong, Ye Shenghua
Ultrahigh Density Data Storage in SiO2/Si System by Electrostatic Force Microscope
94
Wang Zhiyong, Zhang Honghai, Bao Jianbin, Guo Wenming
Nanometer Grating Technologyand its Research Direction
100

Zhang Shaozong, Zhang Haifeng
Practical System for Long-Range Nano-Positioning and Nano-Measurement
105
Zhao Meirong, Qi Yongyue, Lin Mingchun, Lin Yuchi
Present Status of Piezoelectric Linear Microactuator
110

Zhang Donghua, Chen Zaili
Novel Micromachined Silicon Accelerometer Using DETF Resonators
115
Zhong Ying, Zhang Guoxiong, Li Xingfei
Structure and Dynamic Model of Silicon Micromachined Accelerometer with
High G value
119
Zhang Libin, Dong Jian, Ji Shiming, Xiong Sichang
Integrated Measurement of Micro Motions for MEMS Dynamic Performance Analysis
125
Li Dachao, Feng Yalin, Jin Shijiu, Jin Cuiyun, Hao Yilong, Zhang Dacheng
Three Arm Micro-Tweezers
130
Zhao Xin, Yuan Dajun, Ping Zhiming, Huang Wenhao, Chu Jiaru
Micro Inertial Measurement System
134
Lan Jinhui, Zhou Zhaoying, Li Lian, Tu Deyu, Zhao Weizhi
Evaluation Mechanical Properties of MEMS Material's
139
Zhao Zexiang, Wang Hairong, Jiang Zhuangde
Optical Model for Programmable Phase Grating Based on MOEMS
145
Chen Feifan, Yin Ling, Li Yunlong
Actuator with Curling Cantilever Beam Used in MEMS Optical Switch
151
Zhu Xiaorui, Luo Yuan, Huang Shangliang
Application of Polarization Modulation Technique to Acquisition of Optical
Properties of Thin Films
156
Sun Chunpeng, Wang Fengping, Liu Huaiping, Luo Sheng
Gold Layer of MEMS Micro-mirror
161
Luo Yuan, Zhang Yi, Zhu Xiaorui, Li Zhu, Huang Shangliang
Characteristics Analysis for Droplets in Piezoelectrically Actuated Microjet
166
Optic-electronics Technologies and Instruments

Invited Papers

The Optic-electronics Autoreflection System for Monitoring of Industrial Objects Deformations..................................................205
Igor A. Koniakhine, Alexander N. Timofeev, Mikhail A. Novikov
A Differential Confocal Optical System Using Gradient-Index lens..................................................211
Tan Jiubin, Zhang Jie, Hu Yanqing
The Research of Portable Color 3D Laser Scanner System Optimization Design..................................................216
Xu Zhiqin, Ye Shenghua, Guangzhao Fan
Development of Total Reflective Type Extrinsic Fabry-Parot Interferometric Fiber Optic Pressure Sensor..................................................223
Jin-Seok Heo, Jung-Ju Lee
A Novel 3D Laser Ball Bar for Machine Tools Calibration..................................................230
Hai Wang, Kuang-Chao Fan
Study of the Integrated Opto-electric Sensor..................................................236
Zhou ZhaoFei, Huang Wei, Zhang Tao, Li Wenjie

Papers

3-D Calibration of an Interference Microscope..................................................243
Xue-Feng Qiang, Wei Gao, Satoshi Kiyono
A Fast Center-positioning Method for an Incomplete Hole of PCB from Vision..................................................247
Kuang-Chyi Lee, Wen-Yuh Jywe
A Scanning Micro-Mirror Simulation for Optical Coherence Tomography
Fong-Ruey Yang, Long-Sun Huang, Jiuun-Haur Shaw

Stabilization of Mean-wavelength for Er+3 Superfluorecent Fiber Source
Chwen-Shell Ho, Jiun-woel Huang

Effect of Measurement Laser Beam Propagation Through Fluid
Z. Tao, Y. Gao

Laser Sensors for the Measurement of Velocity of the Plates
Dalwooo Kim, Choong-Soo Lim, Hyungkuk Park, Kijang Oh

High Precision Three-dimensional Optical Measurement Module Using Fourier Transform Profilometry
Hsinyueh Sung, Li-Fen Tien, Chun-Yu Lin, Yaomin Lin, Chieh-Yi Lo, Teh-Ho Tao

A Novel Approach for Full-field Measurement of Principal Stress Directions in Photoelasticity
Terry. Y. Chen, Y. C. Chou

New Heterodyne Scheme Using an Electro-Optic Modulator for Birefringence Measurements
Yu-Lung Lo, Ping-Feng Hsu

 Novel Three-stage Structure of Erbium Doped Fiber Amplifier
Qiang Zexuan, Zhang Xuliang, He Sailing, Zheng Wenxin, Shen Linfang

Dynamic Measurement of an Elevator Rail Surface Displacement
Li Xingfei, Zhang Guoxiong, Guo Lifeng

Novel Measurement of Target Point Based on Binocular Code Matching
Chen Gang, Yu Zhijing, Che Rensheng, Ye Dong, Huang Qingcheng

Design of Parameters for Relative Devices in Optical Fiber Confocal Scanning Microscopy
Wu Zhen, Yu Qilian

Precision Ranger Based on Laser with two Longitudinal Modes
Zhang Tao, Zhou Zhaofei, Zhou Xiuyun, Tian Yunhui

Single Camera 3D Coordinate On-line Measuring System
Yu Zhijing, Chen Gang, Liu Changying, Che Rensheng, Ye Dong, Wang Qingzhu, Tian Wei

Structured Light 3-D Vision Inspection Based on RBF Neural Network
Zhang Guangjun, Wei Zhenzhong, Li Xin

Novel Radial Shearing Interferometer Based on Spatial Phase Modulation
Chen Jian, Yang Yongying, Zhuo Yongmo, Zhang Xiaoning, Xiao Yanwen

A Confocal Probe with Gradient Index Lens
Tan Jiubin, Zhang Jie, Hu Yanqing

Design of Microscope Apparatus with Matrix CCD for Inspecting Semiconductor Chips
Yu Houyun, Deng Shanxi
Development of Infrared Multi-spectral Radiation Thermometer
Cong Dacheng, Dai Jingmin, Sun Xiaogang, Chu Zaixiang

Effects of Self-mixing Interference in Multi-mode Laser Diode Theoretical Analysis and Experimental Observation
Yu Yanguang, Zhang Yong, Yao Jianquan

Measurement of Long Focal Length Based on Talbot Effect of Ronchi Grating
Hou Changlun, Bai Jian, Hou Xiyun, Yang Guoguang

Optical Fiber Confocal Interference Technique
Zou Limin, Ding Xuemei

Novel CCD in-plane Displacement Measuring System
Wang Yutian, Zhao Shiqiang, Meng Zong, Sui Hongli

Measurement of Normal Spectral Emissivity of Niobium (at 633nm) by Pulse-heating Reflectometric Technique
Fan Yi, Dai Jingmin, Xiao Peng

Photoelectric Angular Displacement Sensor and its Calibration
Yu Xiaoyang, Zhao Ruolin, Li Xin, Zhao Jun, Chen Deyun, Zhao Xia

Principle of Six-DOF Measurement Probe
Yu Xiaofen, Fei Yetai, Wang Yonghong

Accuracy Analysis for Multi Light-knife Laser Scanning System
Li Bing, Luo Yiping, Sui Liangsheng, Jiang Zhuangde

High Precision Measurement of Air Refractive Index Using Surface Plasmon Resonance Sensor
Chen Qianghua, Wu Jian, Yin Chunyong

Laser Wave-front Measurement System Based on Radial Sheering Interference
Zhang Aihong, Fan Zhigang, Wang Zhiqiang

New 3D Surface Profile Measurement Based On Phase-shift Interfering Technology
Liu Bo, Zhang Jian, Qiang XiFu

New Sun Sensor and its Test
Chen Feifan, Li Yunlong, Shi Yongchao

Novel Laser Source Used for Image Evaluation of Lens
Chen Jin, Ma Jiaju, Yao Jianquan, Wang Peng, Zhu Meng, Yu Yizhong, Zhang Yong, Du Pu

Stray Light Analysis and Calculation Modeling of Optical System
He Zhiping, Cen Zhaoqin, Li Xiaotong, Zhu Qihua, Zhang QingQuan

Development of Optical Systems for On-line Inspection of Rail-wheel Trackside
Zhong Yi, Deng Shanyu, Yang Yongyao, Ren Xiaoxiao

Optimization Design of Spectrum Analysis Optical Systems
Li Xiaotong, Cen Zhaoqin

Range Finder Based on Constructive Light Encoding
Yang Ling, Fan Jianying, Yu Xiaoyang, Qiang XiFu

Boundary and Edge Detection in Range Image Using Constructive Light

- XIII -
Fan Jianying, Qiang Xifu, Yang Ling, Wu Liying
Design and Fabrication of Double-sided Diffraction Gratings.................................................429
Chen Tingzheng, Lu Haibao, Chu Xingchun, Yang Huayong
Precision Measurement of Small Rotation Angle and Straightness Using Linear
Gratings..........................................................................................................433
Wu Liying, Zhang Jian
Shape Measurement Using Unwrapping Mask Based on Temporal Phase Unwrapping.....438
Lin Yuchi, Cheng Dongmei, Niu Xiaobing, Zhao Meirong, Sun Zhanyuan, Zhang Yuxiang
Stimulation of Violet Lasers to Traditional Chinese Medicine Photosensitizer for
Diagnosis of Early-stage Gastric Cancer.................................................................442
Ma Yangwu, Liang Di, Li Lanna
Linewidths of InGaAs-GaAs-AlGaAs DBR Lasers with Varied DBR Reflectivities..............448
Fang Dawei, Zheng Yingjun, C. Manzanedo, S. Reuel, Li Chengxia
Slope Measurement Method with Differential Confocal Microscope....................................452
Zhang Jianhuan, Tan Jiubin
Liu Tianfu, Yu Shifan
Optically Powered Hybrid Temperature and Pressure Measurement System with
Optical Fiber Link........................................................................................................462
Yu Zhijing, Che Rensheng, Ma Shuying, Tian Wei, Liu Shiguang, Wang Qingzhu
Measurement of Oil Contamination by Light-blockage......................................................469
Fu Jingye
Plate Field Spectrophotometer for Auto-Bioanalyzer..............................................................473
Ma Haitao, Jiang Yongheng, Tang Yugo, Chen Jinyong, Huo Jianwei
Detection Of Fault Gas inTransformer Oil By Spectrum Difference Absorption.................476
Wang Yutian, Meng Zong, Liu Yonghong, Sui Hongli, Zhao Shiqiang
Non-contact Photoelectric Displacement Instrument........................................................481
Ding Xibo, Guo Jianying, Zhou Zhen
Photoelectric Silt Content Measuring Instrument with a Light-course
Differential Detector.................................................................................................484
Shen Jianfeng, Gu Jianming
Multihole Coaxiality Measuring Instrument Based on the Method of Laser
Collimation..................................................................................................................489
Chen Haiyan, Gao Shanming
Simplified Model of Double Camera Coordination for Geometric Measurement..............496
Li Haiming, Chen Dianhong, Shan Yuekang
Research on Dust Measurement Instruments Using Infrared..............................................501
Jiang Xiuqiang, Zhang Xiaoguang, Zhao Xiping
Optical Detection System for Internal Gun Barrel Quality..............................................504
Yuan Huijuan, Yu Xiaoyang, Guo Jianying, Wang Mukun
Methods of Improving Photoconductive Sampling..............................................................509
Liu Qinggang, Kuang Dengfeng, Zheng Lifen, Wang Zhan, Hu Xiaotang
Elimination of Image spoiling oscillation in Optical Coherence Tomography System........514
An Yuan, Yao JianQuan, Wang RuiKang
Calibration of 3-D Profile Measuring System.....................................................................518
Sui Liansheng, Tian Ailing, Li Bing, Jiang Zhuangde
3D Measuring System Based on Color-encoded and its Errors Analysis.........................523
Yuan Huijuan, Yu Xiaoyang, Guo Jianying, Wang Mukun, Li Fenlan
The CCD Measurement of Geometry and Form-Position Error of Large Workpieces........529
Gao Yinhai, Meng Xiangdi, Wen Shihe, Gao Le
Laser Angle Measurement System with Single Cylinder Reflection Grating...................534
Han Xudong, Ai Hua, Xiao Zuojiang
Application of PSD for Displacement Measurement of Four Degree-of-freedom..............538
He Jin, Fan Zhigang, Chen Juan
Laser Dynamic Measure-Identifying Line Components.....................................................541
Wang Tao, Zang Guiyuan, Yao Jia-quan, Guo Ling, Chen Jin, Li Xifu, Yu Yizhon, Zhang Baigang Xu degang
Six Degree-of-Freedom Calibration System.....................................................................546
Fan Zhigang, Zuo Baojun, Xu Shiwen, Zhang Fengsheng
Self-mixing Interference Effects in the LD Pumped Multi-mode Solid State Laser
Theory and Experiment.................................................................................................551
Zhang Yong, Yu Yanguang, Yao Jianquan, Chen Jin, Wang Peng, Zhang Baigang
Auto-Optimum Measure Strategy For Cragged Surface Based On Computer Vision........556
Yang Yongyue, Deng Shanxi, Ding Xinghao, Zhong Yi, Ren Xiaoxiao
Integrated Curves Measuring and Reverse Engineering System with Laser
Scanning System........................................................................................................560
Luo Yiping, Li Bing, Jiang Zhuangde, Wang Yuguo
An Optical Characteristic Testing System for the Infrared Fiber in a Transmission
Bandwidth 9-111 m.......................................................................................................565
Ma Yangwu, Liang Di
Coupling Device with Output Power Continuously Tunable “laser-infrared optical
fiber” for Surgery ........................................................................................................570
Ma Yangwu, Liang Di
Micro-displacement Measurement Based on Imaging Technology..................................573
Zhao Hui, Liu Weiwen, Hong Haitao, Yu Pu
Analysis of the Signal Processing Algorithm in a All Digital Closed-Loop Fiber Optic
Gyroscope..................................................................................................................577
Han Jianhui, Gu Yunbiao
Environment Monitoring Technologies and Instruments

Invited Papers

Differential Optical Absorption Spectroscopy Technology For Air Quality Monitoring.....582

Papers

Soot Inspection and Statistic by PDA .................................................................584
Zeng Zhoumo, Yang Qing, Liang Yi
Long-distance Monitoring of Smoke Blackness ..............................................589
Sun Jinsheng, Jiang Jianguo, Sun Tiejian, Jing Xiaohui
Ray Detectors and Their Circuits in Environment ............................................593
Wei Biao, Che Zhenping, Qi Yon, Zhou Mi
Overall Indexing of Indoor Air Quality:
A New Method of Evaluating Indoor Air Quality Based on Gas Sensor Array ..........597
Ma Xuetong, Ma Changxia, Wang Huiying, Wang Lei
DOAS Air Quality Monitoring System ..............................................................601
Zhu Meng, Wei Wenna, Liu Dezheng, Chen Jin, Wang Peng, Yao Jianquan
Determination of Residues of Endosulfan in Tea by Gas Chromatograph ............606
Chen HaoCai
On-line Continuous Measurement of Dust Concentration in Exhaust Duct by
Laser Scattering Method .......................................................................................610
Zhao Yanjun, Zhang Xuefeng, Lu Yong, Wang Shimin
Rapid On-line COD Analysis Apparatus based on Virtual Instrument Platform .........616
Liu Weiling, Zhang Shixiang, Ran Duogang, Yu Qilian
COD Measurement Based on 3D Liquid Drop Fingerprint ..................................620
Qiu Zurong, Chen Haixiu, Song Qing, Zhang Guoxiong

Modern Instruments for Life Science

Invited Papers

Three-dimensional Image Generation for Medical Respiration Measurement ..........626
Y. Gao, K. Wong, S. Tse
A Co(en)33+ Inserted in DNAs of 3 Species in Rhododendron ...............................632
Wang Lanzhou, Cao Wenxia, Lu Xisuoquan

Papers

Gas Mixture Analysis with Dynamic Gas Sensor Array Signals ..........................637
Information Technologies and Instruments

Invited Papers
Performance Analysis Model of Distributed Measuring System..................708
Che Rensheng, Luo Xiaochuan, Huan Qingcheng, Ye Dong

Papers
Research of Testing Channel Symbol Error Rate by Msequence.................714
Zhang Xiaobing, Wang Mukun, Yang Mingji
Conceptual Framework for Intelligent Residential Community Based on
Embedded Internet....................................................719
Wang Fusheng, Jia Yuhui, Tan Jinbin
Circular Recording Technique in Unmanned Digital Video Surveillance System......724
Cao Juliang, Lu Haibao, Xu GuoLiang
Broadband micromachined antenna for Bluetooth device......................728
Wu Zhengzhong, Zhong Xianxin, Li Xiaoyi, Yu Wenge
Key remote monitoring techniques........................................733
Zhou Hongyu, Chen Peijiang, Xu Wanli
Wireless Channel Measurement........................................737
Chen Shaoping, Zhu Cuitao, Yang Zhongle
The Study of Hex No Carrier Data Transmission Mode..........................742
Dong Yanhua, Wang Mukun, Wei Kaifeng
Special MODEM Used in Industrial Control Network..........................745
Li Xin, Dong Jingwei, Yu Xiaoyang, Liu Jing
Application of VXIbus Technique to Automatic Calibration of Wind Tunnel Balance......749
Fan Zhigang, Zuo Baojun, Xu Shiwen, Zhang Fengsheng, Chai LinWei
Actinometer Used For Measurement of Textiles Color Fastness................753
Yang Liangen, Yao Zhongtao
Tracking and Guiding System for Horizontal Directional Drill Machines........758
Xu Tao, Luo Wusheng, Lu Haibao
Real-Time Preprocessing Satellite Image of and Realization of Hardware........762
Ren Dahai, Dai Mi, Cui Huayang, You Zheng
Helmet Mounted Display System Configure and Design..........................767
Liao Chengbin, Zhang Jian, Wu Liying
Network Topology Probing and Delay Measurement..............................772
Chen Qingzhang, Lv Lingyan, Zhou Mengling, Zhao Xiaomin
3D Measurement and Reconstruction of Slice Images...........................778
Hu Yongjun, Li Hao, Wu Xiuqing, Gan Bo, Huang Wenhao
Using USB Protocol in Virtual Instrument..................................784
Zhou Zhen, Yuan Jing, Wang Zhuo, Guo Jianying

Extraction and Identification of Ballistic Texture with Wavelets........................................788

Chen Qinghu, Xie Tiebang, Wang Fangming

Recognition of industrial parts based on BP neural network............................................793

Liu Bo, Jiang Lifang, Shi Lianhui
